DETAILED ACTION

Terminal Disclaimer

1. The terminal disclaimer filed on 4/24/2004 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. co-pending application 11/375,161 and U.S. co-pending application 10/806,242 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Claim Objections

2. Claims **121-135** are objected to because of the following informalities: Claim **121** is duplicated. Please see claim pages 39-41. Appropriate correction is required.

Response to Amendment

3. The amendment filed 8/20/2007 (with regard to claims 43-46 and 73) is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: "A computer useable recording medium having computer logic stored thereon for executing on a processor, the computer program logic comprising..."

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 43-46 and 47 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The added material which is not supported by the original disclosure is as follows: "A computer useable recording medium having computer logic stored thereon for executing on a processor, the computer program logic comprising..."

Allowable Subject Matter

6. Claims 1-42, 47-72, 74-135 are allowed.
